Professional Summary

Full-Stack Developer with hands-on experience in React.js, Node.js, Express.js, and MongoDB. Built and deployed multiple web applications including a real-time chat app, a waste management platform, and a furniture e-commerce site. Passionate about frontend development, backend development and UI design.

Skills

Languages: Java, C, Python
Web Technologies: HTML, CSS, JavaScript, React.js, Node.js, Express.js, REST API
Databases: Oracle SQL, MongoDB
Tools: Figma, Git, Netlify, Render
Soft Skills: Teamwork, Leadership, Communication

Internship Experience

Project Trainee – Data Validation Initiatives for Cybersecurity Products, Tata Communications (Novamesh Limited)
- Worked on real-time data validation and cleaning for cybersecurity product initiatives. 31 Aug 2026 - Present
- Assisted in identifying data inconsistencies and improving data quality.

Full Stack Web Development Internship, Softrate Tech Park Jun 2025 (15 Days)
- Built a personal portfolio and Furnovera e-commerce site during the internship.
- Performed manual testing on Freshbooks.in, documenting UI bugs and learning SEO basics.

Full Stack Web Development Internship, InternEzy Jan 2025 – Mar 2025
- Cloned the Google homepage UI with a functional search bar using HTML and CSS.
- Built a multi-feature web app (digital timer, New Year counter, age calculator) using HTML, CSS and JavaScript.

UI/UX Design using Figma Internship, InternEzy Jul 2024 – Sep 2024
- Learned UI/UX design principles — wireframes, personas, user flows, and carousels — using Figma.
- Recreated the Infosys Springboard website UI in Figma, applying components and animation techniques.

Projects

AI-Based Sentiment Analysis System | GITHUB Jun 2026 – Sep 2026
Tech Stack: Python, Scikit-learn, TensorFlow/Keras, FastAPI, Streamlit, NLP, Chrome Extension
Developed an AI-based sentiment analysis system that classifies reviews into Positive, Negative, and Neutral using TF-IDF, linguistic features, Logistic Regression, and BiLSTM models.
Built a FastAPI prediction service with a Streamlit dashboard and Manifest V3 Chrome extension for real-time and batch sentiment analysis.

WasteWise – Digital Waste Management Platform | GITHUB Mar 2026 – May 2026
Tech Stack: React.js, Node.js, Express.js, MongoDB, REST APIs
Developed a waste management platform with role-based dashboards, JWT authentication, and REST API integration for waste pickup management.

Furnovera – Furniture E-Commerce Website | GITHUB Jun 2025
Tech Stack: HTML, CSS, JavaScript, Node.js, MongoDB
Developed a full-stack responsive furniture site with product listings, category filtering, and a prototype cart.
Hosted frontend on Netlify and backend on Render for smooth performance.

Switchify: Dual-Mode Chat App Feb 2025 – May 2025
Tech Stack: React.js, Node.js, Socket.IO, MongoDB, JWT
Developed a real-time chat app with Friendly/Professional modes, JWT auth, file sharing, typing indicators, and MongoDB-based message batching.

Education

B.Tech - Rajalakshmi Engineering College, Information Technology	CGPA: 7.96/10	2023 – Present
HSC - AV Meiyappan Matriculation Higher Secondary School	Percentage: 74%	2022 – 2023
SSLC - Balalok Matriculation Higher Secondary School	Percentage: Government Pass	2020 – 2021
